

FreshTraq™

Micromarket monitoring & notification system

SAVES TIME AND MONEY

"The ability to see the temperature of refrigeration and the status of components is a huge advantage", said Craig Hunt, Chief Technology Officer at Imperial, who started using FreshTraq in 2017.

TAKE CONTROL OF FOOD SAFETY

Which module is right for your market?

FreshTraq™

Module connects directly to a FreshIQ health timer lock. If the unit is not equipped with a FreshIQ lock, one can be easily retrofit to existing coolers and freezers.

FreshPay™

Module to use when the unlock/lock functions are tied to a payment event.

ColdTraq™

Temperature only module, independent of a health timer lock, that can be placed anywhere in the cold chain.

EASY TO USE

- ▶ Accessible from any phone or PC
- ▶ Enroll as many users as desired
- ▶ 24/7 accessibility
- ▶ Monitor all locations refrigeration equipment from a single portal

REMOTE CONTROL

- ▶ Lock or unlock your equipment from anywhere
- ▶ Troubleshoot issues remotely
- ▶ Reduce downtime by deploying service techs to the right place at the right time

REAL TIME ALERTS

- ▶ Locked for overtemperature
- ▶ Locked for power loss
- ▶ Locked for probe failure
- ▶ Communication failure

COMPLIANCE

- ▶ Real time visibility and analytics
- ▶ Health inspection ready
- ▶ Generate audit trails and logs
- ▶ View refrigeration performance history

FreshTraq™

Feature	Specification
Temperature history log	6 minute interval data collection with 90 day history
Remote lock/unlock	Real time control with confirmation
Door status events	Logged with date and time; real time alerts
Locking events	Logged with date and time; real time alerts
Temperature probe events	Logged with date and time; real time alerts
User hierarchy	Global Admin, Admin, Technician, Operator
