

FreshConnect™

Remote control for Performax and Vision Coolers

FreshTraq™ portal

Remote unlock:

- Control from anywhere

Compliance:

- Monitor temperature
- Real-time visibility and analytics
- Refrigeration performance history

Easy to use:

- Monitor all equipment through a single portal
- 24/7 access

Easy install:

- Module connects between existing controller and lock
- Externally mounted
- Optional temperature probe installation

Real-time fault alerts:

- Generated from cooler controller
- 24/7 alerts via text or email

Control you want. From anywhere. Peace of mind you need.

Kit Contents:

How to Install:

Remove existing harness connecting the controller to the lock. Connect controller harness into the module and the module harness into the lock. Optional temperature probe needs to be installed internally.

How it Works:
